### Show your current location using the Current Location button

- First tap: blue pin, map centered around your location, up is North
- Second tap: blue pin, map centered around your location, up is forward

### Zooming in and out

- Double-tap with one finger to zoom in
- Single-tap with two fingers to zoom out
- Reverse-pinch to zoom in
- Pinch to zoom out

### All about Pins

- Drop a pin by touching and holding on screen
- You get ONE dropped pin at a time. Next one you drop replaces existing.
- Slower: Page Curl button, then Drop Pin (or Replace Pin if a pin exists)
- Drag a pin to a new location.
- Delete a pin by tapping it, then touching the white chevron in blue circle (a "Disclosure Control" but we will call it the Details button), then "Delete Pin"

### All about Flags

- Touch where there's nothing to make the flag go away
- Touch the Details button to the right and...
  - Directions To Here
  - Directions From Here
  - Add to Contacts, Share Location, Add to Bookmarks
- Touch the bust in the orange circle to the left and...
  - Street View!
  - Rotate around and move down the street
  - Zoomable (double-tap in, double-tap out)
  - Touch the circle (a piece of the map) to get back to the map

### Search vs. Directions

- Search current map for *stuff* (coffee, sushi, ATMs, BART stations)
- Search for *people* from your address book
- Search for *points of interest* (the Ferry Building, Coit Tower, Chinatown)
- You can get directions to any found item in three steps
  - Tap pin for that item, tap "Directions" at bottom of Map, then Route
  - (Slower: tap pin, tap Details button, tap "Directions To Here", then Route)
  - List View (Page Curl button)
  - Show Traffic (Page Curl button)

### Using Maps with other Apps

- In Contacts, tap an address to show it in Maps
- In Mail, tap an address to show it in Maps
